CHECK REPRESENTMENT (RCK)

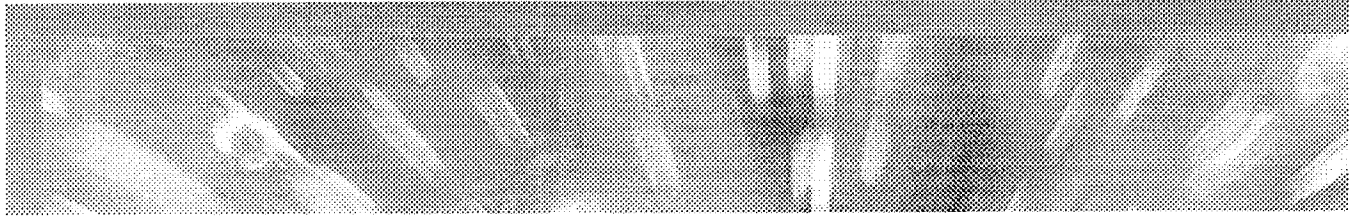

Improve Collection Process

Retail Owners, and Collection Agencies can simplify and improve their collection process by replacing traditional method of collecting returned Non-Sufficient Fund (NSF) checks with the EFT Network's Electronic Check Re-Presentation (RCK).

RCK is the conversion of a paper check returned and marked NSF (or uncollectible) from a bank into an electronic check for presentation through the Automated Clearing House (ACH).

- » Yields a 25-35% higher rate of recovery than paper checks
- » Saves time and money in the costly collection process, as well as bank redeposit transaction fees
- » Virtually eliminates the expense of lost revenue due to NSF checks
- » You will know in days if a check has been paid or returned
- » Electronically re-presentments to coincide with likely consumer deposits
- » Increases recovery rates

CHECK GUARANTEE AND COLLECT

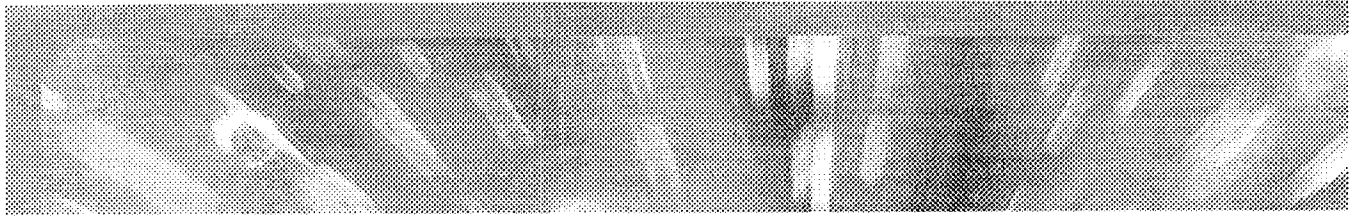

Check Guarantee

PAYTEK Solutions will streamline your checks process so that guarantee of full settlement mimic that of credit cards. Whether your business accepts check payments at the counter, in the mail, over the web or over the phone, a customized check guarantee program ensures no losses due to bounced checks. Rates are far less than your MC/VISA transactions.

TRADITIONAL CHECK RECOVERY

Traditional Check Recovery can sometimes be the solution without any out of pocket cost to the merchant. We monitor consumer accounts for funds availability and collect from the consumer account. We report all delinquencies to a national database and maintain the data until the debt is paid. With thorough reporting, merchants will be positioned to monitor the status of each check under collection, as well as identify trends in their check acceptance procedures. The ability to monitor information omitted by the cashier provides you with valuable feedback that can enhance your loss-prevention program.
